EDUCATION

- ❖ **M.S. Data Science** | GPA: 3.80 | Expected Graduation Date: December 2025
New York Institute of Technology | Old Westbury, New York
- ❖ **B.A. Economics & Political Science** | Graduation Date: December 2020
Stony Brook University | Stony Brook, New York

RESEARCH

- ❖ **Fraud Detection with Supervised Machine Learning in R**
Built logistic regression and decision tree models to predict fraud probabilities and classify fraudulent credit card transaction data. Compared the performance of the supervised machine learning models for fraud detection using ROC AUC, Precision–Recall AUC, Confusion Matrix, and F1-scores.
- ❖ **Cluster Analysis with Unsupervised Machine Learning in Python**
Built k-means, hierarchical, and density-based (DBSCAN) clustering models for data classification. Compared the performance of the unsupervised machine learning models using silhouette scores, adjusted rand index (ARI), and normalized mutual information (NMI).
- ❖ **Exploratory Data Analysis with United Nations Refugee Data in Python**
Queried and merged demographic and legal data from the United Nations Refugee Data Finder Tool and performed time series analysis to uncover regional trends and patterns.
- ❖ **Exploratory Data Analysis with Census Data in Python**
Cleaned, transformed, and visualized population data derived from the Census Bureau’s American Community Survey to explore linguistic trends and patterns at the community district level.

PROFESSIONAL EXPERIENCE

- ❖ **Immigration Paralegal** | June 2025 – Present | Full-time
McBean Law, PLLC | White Plains, New York
- ❖ **Humanitarian Response Caseworker** | March 2024 – June 2025 | Full-time
Cherokee Federal | Manhattan, New York
- ❖ **Immigration Paralegal** | May 2022 – January 2024 | Full-time
Law Office of Alexandra Mayen Rivera, P.C. | Huntington, New York

SKILLS

- ❖ **Bilingual professional** | fluent in English and Spanish with verbal and written communication proficiency.
- ❖ **Python libraries** | NumPy for numerical computing, Pandas for data manipulation, Matplotlib for visualization, and Scikit-learn for machine learning modeling.
- ❖ **R libraries** | ggplot2 for visualization, dplyr for data manipulation, and tidyr for data cleaning.
